

DHAIFALLAH AHMED

Fullstack Developer

Riyadh, Saudi Arabia | +966536547818 | devdhaif@gmail.com | LinkedIn: <https://www.linkedin.com/in/devdhaif>

SUMMARY

I am a Full Stack Developer with 5+ years in front-end technologies like React.js, Vue.js, and TailwindCSS, specializing in creating intuitive user interfaces. Over the past 2 years, I've also worked with Laravel, MySQL, and Inertia.js, contributing to both front-end and back-end development. I'm eager to continue growing and bringing value to fast-paced teams.

EXPERIENCE

Front-End Web Developer

05/2020 - Present

[Meraki UI Lab](#)

- Enhanced front-end UX and increased the website's traffic rate by 20% in six months by optimizing page load speed and content clarity.
- I collaborated effectively within a 4-person team to deliver a user-friendly and responsive website for Meraki UI and addressed GitHub issues promptly to ensure smooth project progression.
- Designed and developed more than 150 reusable and responsive components to maintain consistency and scalability.
- Expanded website accessibility by implementing RTL (right-to-left) support languages for 100% of the components to cater to diverse user needs.

SKILLS

Front-end: HTML, CSS, Javascript, React.js, Next.js, Vue.js, Tailwindcss, Bootstrap, Material UI, Vuetify, Redux

Back-end: PHP, Laravel, MySQL, Firebase.

Tools: Git, Github, Vite, NPM, Postman, Trello, Jira and Figma.

Technical Skills: Data Structure, Database Design, Requirements Gathering, Algorithms and Agile Environment.

Soft skills: problem-solving, teamwork and collaboration.

Basic Experience: Flutter, Typescript, Google Analytics, RESTful APIs.

CAREER PROFILE

Software Developer

- Over 3 years of experience in PHP and the Laravel framework: developed and maintained dynamic web applications with a focus on performance.

- Proficient in building robust RESTful APIs: designed and implemented efficient and scalable RESTful APIs, ensuring seamless communication between client and server.
- Actively used Git and GitHub for version control: managed code versions and collaborated effectively with team members through branching, merging, and pull requests.
- Strong understanding of database design and administration using MySQL, Firebase, and Supabase: Designed, optimized, and maintained relational and NoSQL databases to support high-performance applications.
- Excellent problem-solving skills with a solid foundation in data structures: Applied data structure knowledge to optimize algorithms and improve application efficiency.
- Experience with mobile app development in Flutter: Built and deployed mobile applications for Android and iOS, leveraging Flutter for cross-platform development.
- Good experience in C# and desktop application development: Developed desktop applications using C#, focusing on user experience and system integration.

Front-End Developer

- Over 5 years of experience in front-end technologies including HTML, CSS, JavaScript, and TypeScript: Created responsive and interactive web pages with a strong emphasis on user experience and accessibility.
- Expertise in JavaScript frameworks, such as React (Next.js) and Vue (Nuxt.js): Built complex, dynamic web applications using React and Vue frameworks, optimizing for performance and maintainability.
- Proficient in CSS frameworks like Bootstrap and Tailwind CSS: Styled web applications efficiently using CSS and CSS framework, ensuring consistency and responsiveness across devices.
- Skilled in state management using Redux and Vuex: Managed application state effectively with Redux and Vuex, enhancing data flow and user interface reactivity.
- Experienced in using component libraries such as Material UI and Vuetify: Utilized pre-built components from Material UI and Vuetify to accelerate development and ensure a cohesive design language.
- Proficient in design tools like Figma and Sketch: Collaborated with designers using Figma and Sketch to translate design prototypes into functional web interfaces.
- Front-end: HTML5, CSS3, JavaScript, React.js, Vue.js, Bootstrap, Tailwind CSS
- Tools: Git, GitHub, NPM, Postman, Figma
- Performance Optimization: Cross-browser compatibility, responsive design, page load optimization, lazy loading, code-splitting
- SEO Knowledge: Basic SEO principles for front-end development, such as optimizing HTML structure, meta tags, and headers for search visibility

PROJECTS

Sadagaat dashboard (React js)

Developed a fully functional dashboard for the website admin and other users roles.

Created reusable components, pages and logic to use thorough the dashboard.

1. [NeelainCom \(Laravel, Vue.js, MySQL, Tailwind CSS\):](#)
 - Developed a Q&A platform similar to StackOverflow, facilitating knowledge sharing among a community of my college (around 1000 users) for my final graduation project.
 - Developed a scalable voting system capable of handling 90 votes per minute.
 - Implemented a 2 level (admin, user) user role system for the Q&A platform, enabling clear separation of user and admin functionalities.
2. [E-commerce Store \(React.js\):](#)
 - Developed a user-friendly e-commerce web app in React.js featuring shopping cart functionality and efficient state management.
 - Collaborated with an online partner to implement X feature, resulting in a 60% decrease in development time.
3. [House Marketplace \(React.js, Firebase\):](#)
 - Developed a real estate web application facilitating the listing and browsing of properties for rent or sale.
 - Increased user engagement through user authentication (email/Google).
 - Enhanced user engagement by integrating interactive map functionalities powered by Leaflet map functionalities using the Leaflet library.
4. [Food Menu App \(Next.js, Firebase, Tailwind CSS\):](#)
 - Developed a food menu app for a restaurant, designed for scalability and reuse.
 - Implemented a dashboard for admin to manage dishes and reviews.
 - Created a responsive UI for users to easily filter dishes and leave reviews.
 - Designed with fast performance and intuitive user experience in mind.
5. [Chat App \(Vue.js\):](#)
 - Built a real-time chat website similar to WhatsApp using Vue.js, enabling seamless user communication.
 - I Ensured seamless and efficient messaging features for users.

EDUCATION

June 2012 - September 2014

22 May High School, Yemen – Al Bayda – High School Diploma

June 2016 - September 2022

Alneelain University, Sudan – Khartoum – Bachelor Of Software Engineering

CERTIFICATION

- The Frontend Developer Career Path ([link](#))
- JavaScript Algorithms and Data Structures ([link](#))
- Agile Requirements Foundations ([link](#))
- Advanced React
- Google Analytics Certification ([link](#))

AWARDS AND ACHIEVEMENTS

Top 0.2% in Al Bayda and Top 0.17% in Yemen (2014)

Achieved 8th place out of approximately 4000 students in the Al Bayda region (top 0.2%) and ranked around 500th students in Yemen (top 0.17%) during high school in 2014.

Top 1% of Stack Overflow users (2022)

Recognized for contributions and expertise in [Stackoverflow](#), being in the top 1% of users in 2022.
