SUMMARY

Front-End Engineer with 5+ years of experience building high-performance React applications (Next.js, TypeScript, TailwindCSS). Proven track record of achieving 90+ Lighthouse scores, crafting 150+ reusable components, and delivering accessible, bilingual RTL/LTR interfaces. Experienced in cross-functional collaboration with designers, product managers, and backend engineers. Backed by 2+ years of full-stack development with Laravel and MySQL.

EXPERIENCE

Front-End Developer | ADX | Riyadh 11/2024 – Present

- **Architected and built** the “Try ADx” virtual campaign simulator using React.js, TypeScript, and Zustand, enabling advertisers to instantly preview media on custom illustrations with client-side aspect-ratio detection
- Designed a **drag-and-drop playlist and media creation tool** using dnd-kit, featuring in-browser image editing, template maker, and complex reorderable layouts
- **Established multi-language support** (Arabic RTL / English LTR) with i18next, following WCAG accessibility guidelines and semantic HTML throughout the platform
- Integrated the web-based digital signage player with **6 microservices APIs** (content management, scheduling, analytics, device management, user management, media processing), handling content synchronization and error recovery
- Constructed the core management dashboard with **multi-tenant support** and an **8+ role RBAC system** with location-based permissions
- Collaborated closely with designers in Figma, product managers, and backend engineers to deliver features aligned with business requirements

Technologies: React, Next.js, TypeScript, Zustand, React Query, TailwindCSS, dnd-kit, i18next, REST APIs

Front-End Developer | Meraki UI Lab05/2020 – Present

- Enhanced front-end UX and increased website traffic by **20% within six months** by optimizing page load speed and content clarity
- Participated in crafting **150+ reusable components** with consistent brand identity, reducing development time by 35%
- Expanded accessibility by applying RTL support for 100% of components with **semantic HTML and ARIA attributes**, increasing Arabic-speaking user engagement by 27%
- Partnered within a cross-functional team of 4 (designers, developers) to deliver interfaces with **95% client satisfaction** ratings

Technologies: React.js, HTML5, CSS3, TailwindCSS, JavaScript, Responsive Design, WCAG

Full-Stack Freelance Developer | Independent01/2018 – Present

- Delivered **5+ complete web applications** across diverse business domains, functioning as a full-stack resource from concept to deployment on Vercel and Digital Ocean
- Achieved **90+ Lighthouse scores** (e.g., Miyar Capital) through dynamic imports, code splitting, next-gen image optimization, and performance profiling with Chrome/Firefox DevTools
- Optimized Core Web Vitals and SEO, resulting in a **30–40% improvement** in page load times and higher search rankings
- Developed and maintained RESTful APIs with Laravel and MySQL, ensuring seamless client-server communication with **99.5% uptime**

- Applied smooth, modern animations and micro-interactions using **CSS animations, Framer Motion, and GSAP** across landing pages and interactive UIs

Technologies: React, Next.js, TypeScript, Laravel, MySQL, Firebase, Supabase, TailwindCSS, Framer Motion, GSAP

KEY PROJECTS

Digital Signage Web Player

- Engineered a web-based player that **reduces media playback stuttering by 50%** compared to the previous implementation
- Configured **service workers and caching strategies** ensuring 99% content uptime during network interruptions
- Constructed a frame-perfect media scheduler with automated recovery, **reducing manual intervention by 78%**

Miyar Capital – Financial Services Portfolio

- Delivered a bilingual (Arabic/English) investment platform achieving **95+ Lighthouse scores** through dynamic imports and code splitting
- Shipped **40+ reusable, accessible components** with RTL/LTR layout support, reducing code duplication by 30%

NeelainCom – Q&A Platform

- Launched a StackOverflow-style platform serving **1,000+ college users** with an 85% retention rate
- Architected a scalable voting system handling **90 votes/minute** with 99.9% uptime and a multi-user role system

SKILLS

Languages: JavaScript (ES6+), TypeScript, PHP, HTML5, CSS3

Frontend: React.js, Next.js, Vue.js, Redux, React Query, Zustand, TailwindCSS, Bootstrap, Material UI, Framer Motion, GSAP

Backend: Laravel, MySQL, Firebase, Supabase, RESTful APIs

UI/UX: Drag-and-Drop (dnd-kit), Complex Interactive UIs, Responsive Design, Component Architecture, i18n (RTL/LTR)

Accessibility: WCAG Guidelines, Semantic HTML, ARIA Attributes, Screen Reader Optimization

Performance: Lighthouse Optimization, Core Web Vitals, Code Splitting, Lazy Loading, Service Workers

Tools: Git, GitHub, Vite, Webpack, Postman, Jira, Figma, Chrome/Firefox DevTools, Vercel, Digital Ocean

AI-Assisted Dev: GitHub Copilot, Claude AI

Methodologies: Agile, Cross-Functional Collaboration, Database Design

EDUCATION

Bachelor of Software Engineering 06/2016 – 09/2022

Alneelain University, Sudan

LANGUAGES

- Arabic
- English

CERTIFICATIONS

- The Frontend Developer Career Path
- JavaScript Algorithms and Data Structures

- Advanced React
- Agile Requirements Foundations
- Google Analytics Certification

ACHIEVEMENTS

- **Top 0.2% in Al Bayda (2014):** Ranked 8th out of 4,000 students regionally
- **Top 1% of Stack Overflow users (2022):** Recognized for technical expertise and community contributions
